

Rebound Sound Company Covid Protocol

We are currently monitoring and adhering to all California state and Los Angeles County guidelines, as well as all applicable SAG/AFTRA guidelines. Only clients and talent with appointments are admitted into the studio - the general public may not enter the building. We are happy to assist with remote recordings if possible.

ENTRY

- A questionnaire must be filled out prior to entering the facility.
- Temperatures of all participants will be taken daily with an infrared thermometer. Any person will not be allowed in if they have a temperature of 100.4°F (38°C) or higher
- Hand sanitizer is located upon entry to the building and throughout our studio.
- Face masks must be worn by everyone who enters the building. New masks are available if needed.
- Sessions are limited to 1 talent per recording booth.
- All employees are checked for symptoms, including temperature, at the start of each day and if they exhibit any signs of fever they are sent home immediately.
- Employees are instructed to regularly wash their hands with soap and water for no less than twenty seconds.
- Recording sessions are staggered so talent doesn't have to sit and wait inside the lounge area.

CLEANING

- Our cleaning and maintenance teams are using bleach, disinfectants and appropriate cleansers on all work surfaces to ensure safe working environments.
- The studio is cleaned and disinfected hourly. All shared hard surfaces are wiped and disinfected between sessions.
- UVC machine is used to clean microphones and other recording gear.
- All of our employees must maintain 6 ft distant from colleagues and clients. At all times it is possible for talent to avoid being in the same room as any other person.

STUDIO

- Clients are asked to supervise and take part in sessions remotely, when possible.
- Pop filters, mics and headphones are cleaned and sanitized before use.
- Stands and other hard surfaces are disinfected before and after each session.
- A BlueAir Hepa air purifier is installed in recording booth and is actively cleaning the air before and after each session.
- If the talent prefers to bring their own headphones we will accommodate.
- Bottled water is available.
- Contracts can be delivered electronically and scripts may be displayed via video screen.
- If paper scripts are necessary they will be printed on a dedicated printer located inside the booth for the talent, and only the talent may retrieve the paper.
- Cast or group recording sessions (up to 2 people) can be accommodated by linking two separate booths together if needed.
- Personnel onsite is kept to a minimum.

Please notify us if you start to have any symptoms of COVID-19 within 14 days of having worked at our studio so we can notify the staff and other performers so they can self-quarantine.

Let's make this work together!

Welcome
